

Job offer: Senior Consultant (m/f/d) mitigation technologies

Hamburg or Freiburg (Germany), or remote

Help unlock the next generation of greenhouse gas mitigation technologies through climate policy, carbon markets as well as national and corporate plans for net-zero

Perspectives provides globally leading research and consultancy services on **international carbon markets and climate policy**. We are a group of companies located in Freiburg (Germany), Hamburg (Germany) and Alicante (Spain). Our international team consults the private and public sector all over the world. We are globally recognised for our outstanding contributions to the establishment and advancement of international carbon markets. Perspectives shapes and provides first-rate advice on the development of greenhouse gas (GHG) reduction targets, low emission development strategies (LEDS), as well as the new international carbon markets under the Paris Agreement (Article 6) as well as the Voluntary Carbon Market (VCM). We strive for environmental integrity and believe that economic efficiency is key for successful climate policy instruments.

Your role in short

Guide, manage, and work inside project teams on public and private advisory assignments using your strong technical expertise to successfully develop decarbonisation roadmaps, GHG accounting frameworks and carbon crediting methodologies.

Your tasks

- Provide technical expertise and deliverables to various projects, and provide guidance to our highly motivated project teams in how to:
 - o Build robust national, sectoral and project-specific GHG emission reduction calculation models (for example in the context of Nationally Determined Contributions (NDCs), LEDS and the Science Based Target Initiative (SBTi))
 - o Develop methodologies under different carbon market standards (e.g. Verra/VCS, Gold Standard and others) for different project types (including NETs / CCS in their different forms)
 - o Develop GHG accounting/MRV frameworks at the national, sectoral and project-level
- Independent written input into and quality control of calculations and project reports regarding technical aspects that meet high professional standards;
- Autonomously manage projects and project teams
- Present results to clients and international audiences, and justify outcomes/findings
- Support business development and sales with technical expertise

Your profile

- Solid understanding of different mitigation technologies, including CCS and NETs in their different forms (e.g. DACCs, BECCs, etc.), and their role in corporate and national decarbonisation pathways (e.g. SBTs, NDCs, LEDS)
- Previous experience in working with baseline methodologies (e.g. UNFCCC/CDM, Verra, Gold Standard), IPCC guidelines (e.g for NDCs or NAMAs) or corporate GHG accounting protocols
- Previous experience in developing a SBTi sector tool is a plus
- Minimum of 7 years of professional experience, preferably with certification bodies or consulting companies;
- Strong desire to work conceptually on complex technical matters
- Fast solution-orientated thinker with an ability to articulate concepts clearly in writing and orally
- Proven ability to manage projects autonomously, including client communication/management, is a plus

- Excellent presentation skills
- Masters degree related to engineering
- Willingness to travel internationally (once Covid pandemic allows doing so safely);
- Proficient user of Power Point and Word; outstanding Excel skills
- Full working proficiency in English is a must; French, Spanish and German are considered a plus.

Starting date

Planned for 1st May 2021. Deviating timelines can be discussed in the job interview.

Applications closing date: 9th March 2021

Applications

If you are interested in this position and want to work in a flexible work environment, with a young and dynamic team and a lot of space for your own ideas, please send your full application documents in English and in one PDF to: hr@perspectives.cc.
