Evaluations of applications will be done on a rolling basis.

Junior Consultant - Climate Policy (m/f/d) Full-time

Hamburg / Freiburg (Germany) or remote (home-office)

Perspectives is looking for a dedicated Junior Consultant “Climate Policy” who is passionate about supporting a highly motivated team in developing innovative climate policy instruments and approaches to foster the transition to sustainable cooling and enjoys interaction with mainly public but also private clients to build long-term relationships.

Perspectives provides globally leading research and consultancy services on international carbon markets and climate policy. We are a group of companies located in Freiburg (Germany), Hamburg (Germany) and Valencia (Spain) – plus local representations in Austria, Switzerland, Italy, and Finland. Our international team consults the private and public sector all over the world. We are globally recognised for our outstanding contributions to the establishment and advancement of international carbon markets, climate policy instruments and climate finance. Perspectives shapes and provides first-rate advice on shapes and provides first-rate advice on the development of greenhouse gas (GHG) reduction targets, low emission development strategies (LEDS) and the development of new international carbon markets under the Paris Agreement (Article 6), the Voluntary Carbon Market (VCM) and other schemes. We believe that market instruments can play a vital role in facilitating market penetration of modern zero- or low-carbon technologies such as renewable energy, sustainable cooling, and environmentally sound negative emission technologies (NETs). We strive for environmental integrity and believe that economic efficiency is key for successful climate policy instruments.

YOUR ROLE IN SHORT

As Junior Consultant “Climate Policy” - focussing on public and private sector clients, you will serve as a key resource person on all matters related to climate change mitigation strategies, work conceptually and provide inputs specifically on the topic of sustainable cooling and aspects related to the Montreal Protocol on Substances that Deplete the Ozone Layer. You will support with the management of projects and work inside project teams using your strong technical expertise to successfully develop workable regulatory frameworks and ambitious while pragmatic climate policies.

WE OFFER...

...an inspiring and exciting opportunity to actively contribute to the success of climate policy, carbon market and sustainability projects, while growing your project management skills. You will develop your understanding of innovative ways to enable climate mitigation actions in developing countries.

You will work on projects and proposals with major international financing institutions and donors (World Bank, Asian Development Bank, UNDP, GIZ and EU) as well as with private sector clients. Through frequent interaction with our international team based in Hamburg (Germany), Freiburg (Germany) and Valencia (Spain) you will develop your multicultural communication and coordination abilities.

Start date is planned for 1st January 2023 (or later). Deviating timelines can be discussed in the job interview.

Attractive remuneration.

Perspectives is an equal opportunity employer and thus encourages male, female and other applications

YOUR RESPONSIBILITIES

- Providing technical expertise and deliverables to various climate policy and carbon market studies and actively contributing to our highly motivated project teams in delivering project outputs and in interacting with clients. Typical topics include:
 - Advisory services and research on mitigation strategies and policy design, such as for update process of Nationally Determined Contributions (NDCs), development of Nationally Appropriate Mitigation Actions (NAMAs) and low emission development strategies (LEDS);
 - Conceptual design of climate finance and carbon market activities, incl. building and applying robust international, national, sectoral and project-specific GHG emission reduction calculation models and methodologies for climate finance and carbon market activities - for various project types and sectors, but pre-dominantly in the cooling sector;
 - Developing MRV frameworks at the international, national, sectoral and project-level;
 - Assignments related to NDCs and LEDS;
 - Written input into deliverables; elaboration of Excel-based calculations and Power Point presentations;
- Support the management of projects and project teams;
- Present results to clients and international audiences, and justify outcomes/findings;
- Contributions to business development tasks (e.g. proposal and long-term strategy development).
- Support for the preparation of expressions of interest and technical proposals for international tenders

YOUR PROFILE

- Dedicated and experienced professional who cares about climate change, enthusiastic about developing new ideas and projects and about taking responsibility within a team of highly motivated professionals.
- Master's degree related to environmental economics, environmental engineering, and similar.
- Minimum of 3 years of professional experience in the field of international climate policy and sustainable cooling;
- Previous experience in working on climate policy research, sustainable cooling and in the context of the Montreal Protocol;
- Proven ability to work autonomously as well as within an international team and to proactively communicate with colleagues and clients;
- Detail-oriented and committed to deliver high-quality outputs;
- Ability to deal with ad-hoc requests in limited time and under pressure;
- Strong desire in moving things forward and bringing in own ideas;
- Fast solution-orientated thinker with an ability to articulate concepts clearly in writing and orally
- Excellent presentation skills;
- Willingness to travel internationally (if Covid pandemic allows doing so safely);
- Proficient user of Power Point and Word, outstanding Excel skills;
- Full working proficiency in English is a must; French, Spanish and German are considered a plus
